

OFS Certified Trained Installer Program

OFS is pleased to offer a Certified Trained Installer Program for select OFS products and solutions.

As a leader in the fiber industry, OFS is dedicated to providing the best solutions and training in the fiber optic marketplace. As an original inventor of fiber technology, OFS has a deep understanding of fiber optic networks and can expertly train technicians regarding the installation of OFS solutions and how they fit into broader networks.

Solution Certifications:

- InvisiLight® ILU (in living unit)
- InvisiLight® MDU (hallway)
- InvisiLight® Facade (outdoor)
- EZ-Bend® Cables and Assemblies

Program Details:

- Certifications are offered to individual technicians
 - Certified technicians and their employers can claim the credentials (resumes, RFP responses, etc.)
- Certification process includes hands-on training, provided by OFS Application Engineers, and web-based testing to verify learning
- Hands-on training provided in the technician's local office/construction yard
 - Training for each product/solution requires 1-2 hours
 - Optional Fiber Basics training is offered with product/solution training
- Web-based testing can be completed at the technician's convenience (after receiving the hand-on training)
 - Tests for each product/solution require 15-30 minutes
